Note: The selling prices for the three months ended 30 June 2014 were equivalent to the settlement price between our customers and us before operating tax and surcharges.

OPERATIONAL REVIEW

All the Group's existing coal mines located in Guizhou province and Sichuan province are in consolidation in accordance with relevant policies issued by the government authorities. Currently, nine consolidated core mines are designated in Guizhou province and five consolidated core mines are designated in Sichuan province.

Under the nine consolidated core mines in Guizhou province: (i) one mine has entered into production under the requirement of the consolidation plan; (ii) four mines are allowed to undergo consolidation and production at the same time; and (iii) four mines are under construction. The current aggregate production capacity of the five mines under production is approximately 1.95 million tonnes per annum. Three mines under construction will enter into the trial run production in the second half of 2014. The remaining mine under construction will enter into the trial run production in 2016. The aggregate production capacity of the nine consolidated core mines after consolidation is expected to be approximately 6.15 million tonnes per annum.

Under the five consolidated core mines in Sichuan province: (i) two mines have applied for resumption of production under the requirement of the consolidation plan; and (ii) three mines are under construction. Currently, two mines have resumed production with production capacity of 0.36 million tonnes per annum. The remaining mines under construction will resume production in the second half of 2014. The aggregate production capacity of the five consolidated core mines after consolidation is expected to be approximately 1.47 million tonnes per annum.

Note: Production capacity mentioned above represents capacity approved by relevant government authorities and listed out in the mining licenses or capacity submitted to relevant government authorities for application of new mining licenses.

The major operational data for the three months ended 30 June 2014 was calculated based on the internal statistics of the Company and are intended to give investors an overview of the production and operation of the Group. The major operational data may somewhat differ from the data disclosed in the relative periodic reports of the Company. In addition, affected by various factors, including (but not limited to) the adjustment of the macroeconomic policy of the state, changes in the domestic and overseas market conditions, bad weather and disasters, equipment maintenance and safety inspection, material differences may exist among the productive and operational data published quarterly. The aforesaid productive and operational data does not make any express or implied forecasts or guarantees in respect of the Group's operating condition. The investors are hereby reminded of the risks which may result from inappropriate reliance upon or utilization of the information given above.
