WORK SAFETY DOCUMENTARY

01 | Director Ni and His Team from the Law Enforcement Department of Guizhou Bureau of the National Mine Safety Supervision Bureau Conducted Supervision and Assistance Work at Hongxing Coal Mine of Liupanshui Hidili

02 | Relevant Leaders from the Energy Bureau of Liupanshui City and Panzhou City Went to Xingda Coal Mine of Liupanshui Hidili to Carry Out Special Supervision and Assistance Work

Director Ni and His Team from the Law Enforcement Department of Guizhou Bureau of the National Mine Safety Supervision Bureau Conducted Supervision and Assistance Work at Hongxing Coal Mine of Liupanshui Hidili

From September 5 to September 6, 2023, Director Ni and Director Li of the Law Enforcement Department of the Guizhou Bureau of the National Mining Safety Supervision Bureau visited Hongxing Coal Mine of Liupanshui Hidili and made key arrangements for the current safety production work of Hongxing Coal Mine. The focus of supervision and assistance is on comprehensive rectification of mine safety production, implementation of the main responsibility of coal mining enterprises for safety production, coal mine safety training and education, anti "three violations" work, standardization of safety production, and team construction.

Relevant Leaders from the Energy Bureau of Liupanshui City and Panzhou City Went to Xingda Coal Mine of Liupanshui Hidili to Carry Out Special Supervision and Assistance Work

On September 4, 2023, relevant party leaders from the Energy Bureau of Liupanshui City and Panzhou City visited Xingda Coal Mine of Liupanshui Hidili to carry out special supervision and assistance work. They also conducted on-site supervision and assistance guidance on the 10101 fully mechanized mining face of Xingda Coal Mine, deeply analyzed the

severe situation of coal mine production safety faced by 7 subordinates of Liupanshui Hidili, and made key arrangements for safety production work. Deputy director of the Energy Bureau of Panzhou City, head of the Third Coal Supervision Office, head of the Baiguo Squadron, actual controller of Hidili Group, chairman, general manager, and chief engineer of Liupanshui Hidili, and director of Xingda Coal Mine attended the meeting. The focus of supervision and assistance was on the comprehensive rectification of mine safety production, the implementation of the main responsibility for safety production in coal mining enterprises, coal mine safety training and education, anti "three violations" work, quality standardization, and team construction, with the following requirements, Firstly, the coal mine must achieve three requirements: first of all, it must be stationed at Liupanshui Hidili and Hongxing Coal Mine; Secondly, it was necessary to implement the main responsibility for coal mine safety production; Thirdly, it was necessary to compact the main responsibility layer by layer; Secondly, the expert group of Panzhou Energy Bureau inspected and analyzed all existing problems from the company to the coal mine, from technology to management, and strictly implemented them in accordance with the principle of hidden danger rectification. By focusing on team building, quality standardization, dual control system construction, and the special work of "risk prevention and development promotion", we would promote the high-quality development of coal mine safety production.

TRAINING AND DEVELOPMENT

01 | Opening Ceremony of Education Enhancement Training Class

02 | Liupanshui Hidili Training Center Conducted Team Leader Training

03 | Youth Competition & Skills Improvement

Opening Ceremony of Education Enhancement Training Class

In order to meet the management requirements of the management department for coal mining enterprises and improve the level of coal mine safety management, Liupanshui Hidili has reached a long-term talent cultivation cooperation strategy with higher education institutions such as Yunnan Industrial Technician School, Liupanshui Vocational and Technical College, Sichuan University of Science and Technology Workers, and China University of Mining and Technology.

From September 15th to 17th, 2023, Liupanshui Hidili and Liupanshui Vocational and Technical College successively launched training courses for upgrading to higher vocational education. The courses would include majors such as coal mine intelligent mining technology, mining geology, and electromechanical integration.

Liupanshui Hidili Training Center Conducted Team Leader Training

Further enhance the safety awareness of coal mine employees, gradually reduce the number of "three violations", and improve the safety management level of grassroots teams. From September 7 to September 15, 2023, the company organized training for subordinate coal mine team leaders and team leaders at the Liupanshui Hidili Training Center.

Youth Competition & Skills Improvement

To deeply implement the spirit of the 20th National Congress of the Communist Party of China and the spirit of the President Xi Jinping's congratulatory letter to the First Great Nation Craftsman Innovation Exchange Conference, adhere to focusing on the "Four New" and focusing on the "Four Modernizations", and focus on the high-quality development of the coal industry, encourage young engineering and technical personnel in coal mines throughout the city to improve their professional skills and business level, strengthen the construction of a team of young engineering and technical personnel in coal mines, improve the safety production capacity of coal mines, promote the strategic adjustment of the coal industry structure in Liupanshui City, and organize and guide young employees to contribute their youth to the construction of a new comprehensive energy base and the Southwest Coal Supply Center, The Liupanshui Federation of Trade Unions, the Municipal Energy Bureau, the Municipal Human Resources and Social Security Bureau, and the Youth League Municipal Committee plan to jointly hold the Third Liupanshui Workers' Vocational Skills Competition - the "Youth Competition for Skill Enhancement" Liupanshui Second Coal Mine Young Engineering and Technical Personnel Safety Regulations and Measures Competition.

Youth Competition & Skills Improvement

- The coal mine technicians under Liupanshui Hidili actively participated in the Liupanshui Federation of Trade Unions, the Municipal Energy Bureau, the Municipal Human Resources and Social Security Bureau, and the Youth League Municipal Committee. They plan to jointly hold the third Liupanshui Workers' Vocational Skills Competition – the "Youth Competition and Skill Improvement" Liupanshui Second Coal Mine Youth Engineering Technician Selection Competition.

- This competition featured five professional competition projects, including coal mining technology, ventilation and gas extraction, shaft engineering, geological survey and water prevention, and mechanical and electrical transportation.
